

AFON VALE - FICTIONAL WARD REVIEW

O

31/7/26 08:35 - AM ward review

Casey Fiction, TEST-H00418

More alert today. Still SOB walking to bathroom.

Obs: T 37.4, HR 96, BP 128/74, sats 94% RA

Chest: coarse crackles R base. No wheeze.

Eating little - drank approx 600 mL overnight.

Plan:

- 1) continue oral antibiotics
- 2) repeat U&E today + check CRP
- 3) encourage fluids; fluid chart
- 4) physio review / mobilise
- 5) if sats < 92% or increased work of breathing
call medical registrar urgently

Discussed with patient - understands plan.
