

AFON VALE UNIVERSITY HOSPITAL

Fictional NHS Wales Test Organisation

Cardiology

Ref: CARD-TEST-3218

PATIENT (FICTIONAL)

Taylor Testpatient

DOB: 22 November 1966 (synthetic)

Hospital ID: TEST-H00318

NHS No: 999 999 9903 INVALID

1 Test Lane, Demo Town, ZZ1 1ZZ

Dear Dr Example,

This fictional patient was reviewed following intermittent palpitations. A 24-hour monitor showed sinus rhythm with occasional ventricular ectopics. No sustained arrhythmia was recorded.

Echocardiogram: normal left ventricular size and systolic function; estimated ejection fraction 60%. Mild mitral regurgitation. No pericardial effusion.

Medication

Bisoprolol 2.5 mg once daily

Start after checking resting pulse and blood pressure.

GP: please confirm started

Follow-up and actions

- Check pulse and blood pressure two weeks after starting treatment.
- Repeat renal profile and thyroid function if symptoms recur.
- Cardiology follow-up in four months.
- Urgent assessment for syncope, persistent chest pain or sustained rapid palpitations.
